# Repositioning FP in South Sudan

- What has been done
  - South Sudan has just emerged from prolonged civil war
  - The basic health indicators are the worst in the world
  - Our strategies/interventions:
    - Reduction of MMR by 20 % (1643) by 2015
    - Reduction of IMR by 30 % (72) by 2015
    - Reduction of TFR to 5.7 (1 %) by 2015

# Repositioning FP in South Sudan

- What has been achieved
  - Within 6 years of the establishment of the Government of South Sudan (GOSS), very little has been achieved due to many factors
- What are the challenges
  - Emergence from the ashes of the war
  - Poverty
  - Illiteracy
  - Bad roads
  - Poor health infrastructure
