

# Enhancing the Demographic Dividend for Socio-economic Transformation in Africa

## Key Lessons

*Bernard Onyango, PhD.*

*Senior Knowledge Translation Scientist, AFIDEP*

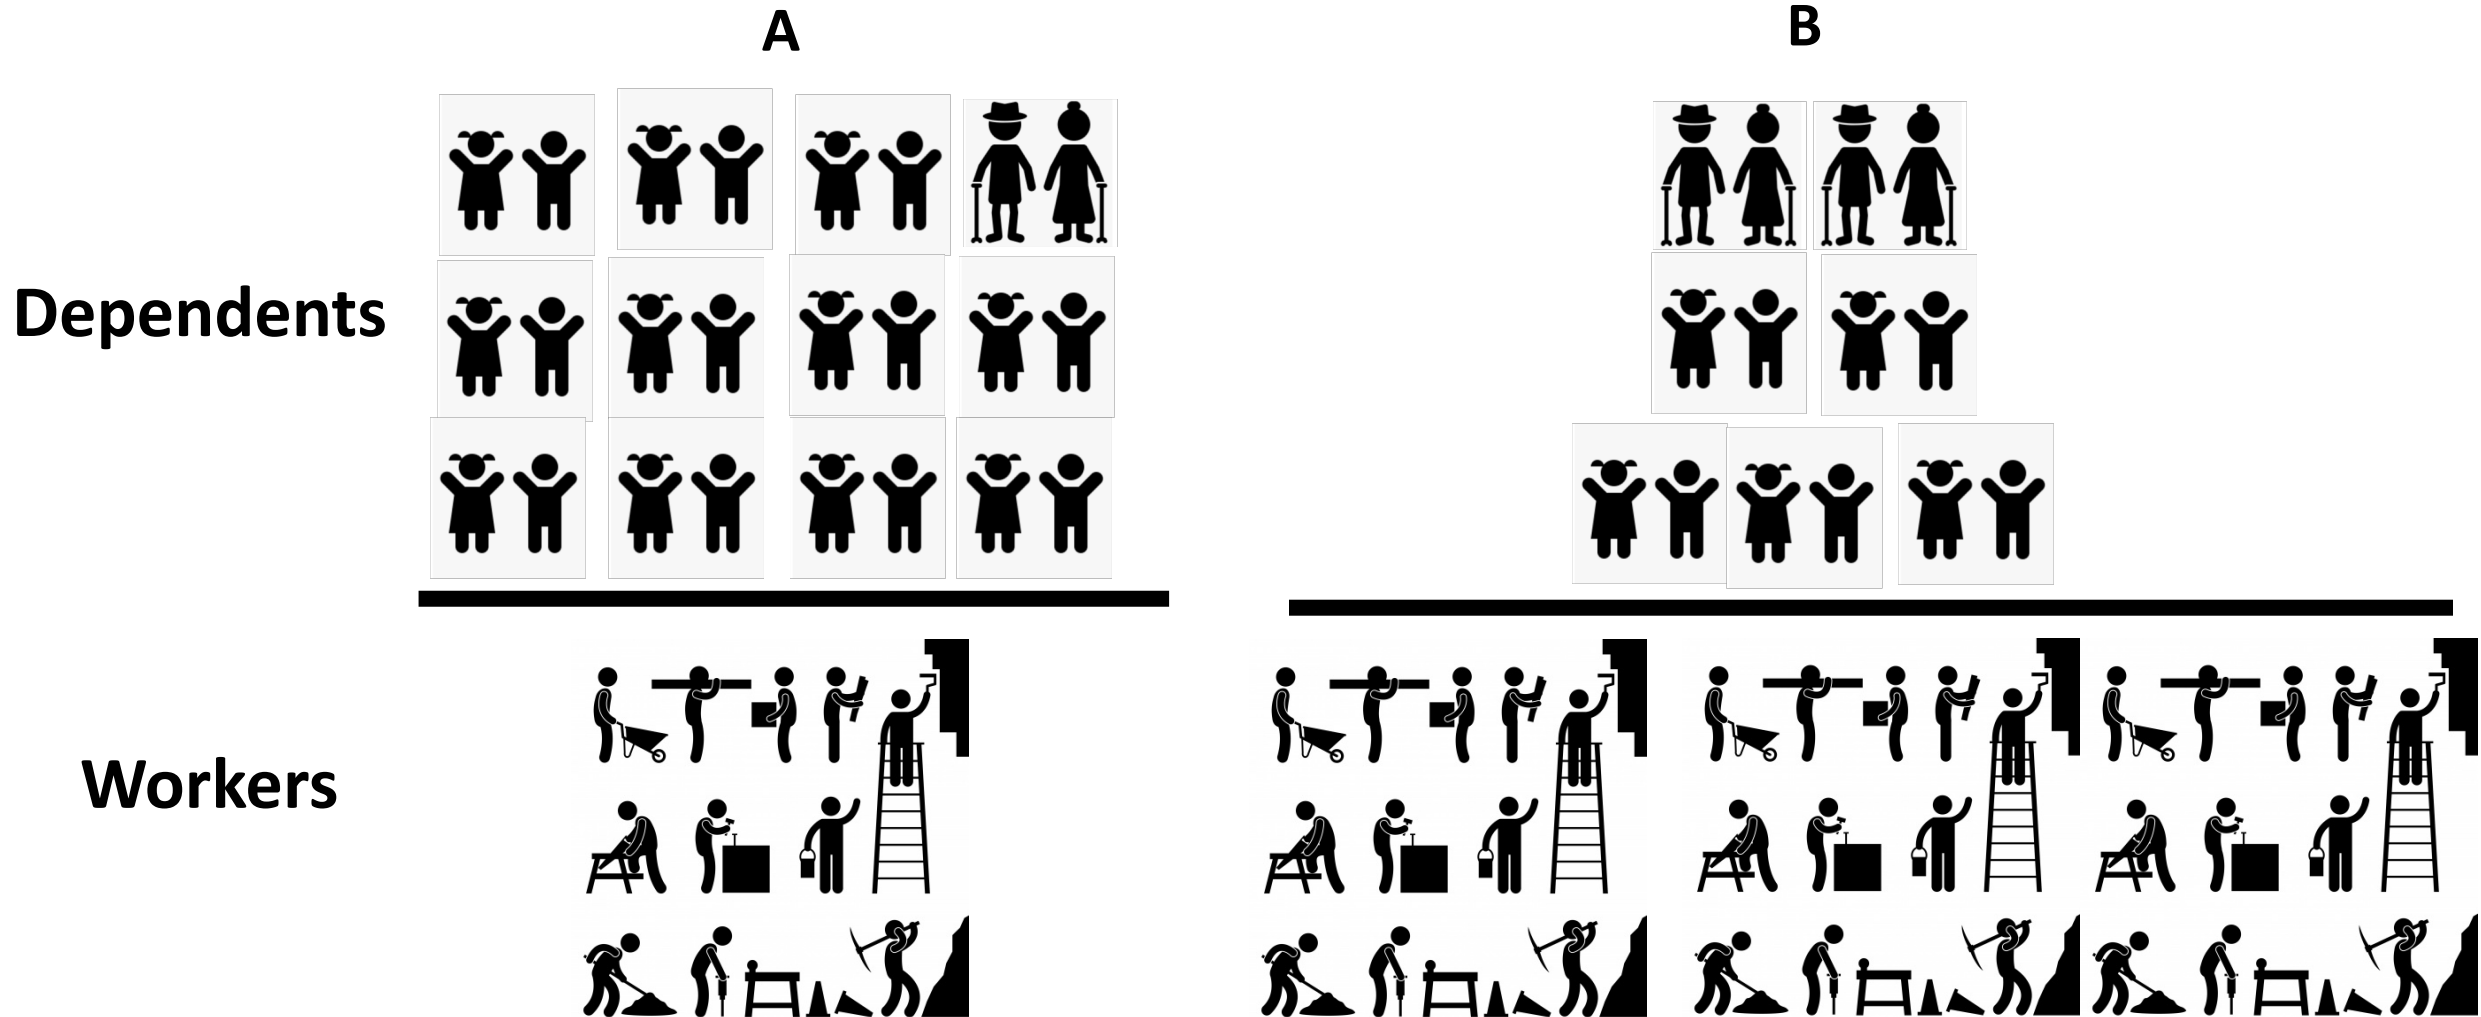

NEAPACOH Meeting 2018, October 30

Speke Resort Munyonyo, Kampala

# AFIDEP DD Footprint in Africa

# What is the Demographic Dividend (DD)?

# What is the Demographic Dividend (DD)?

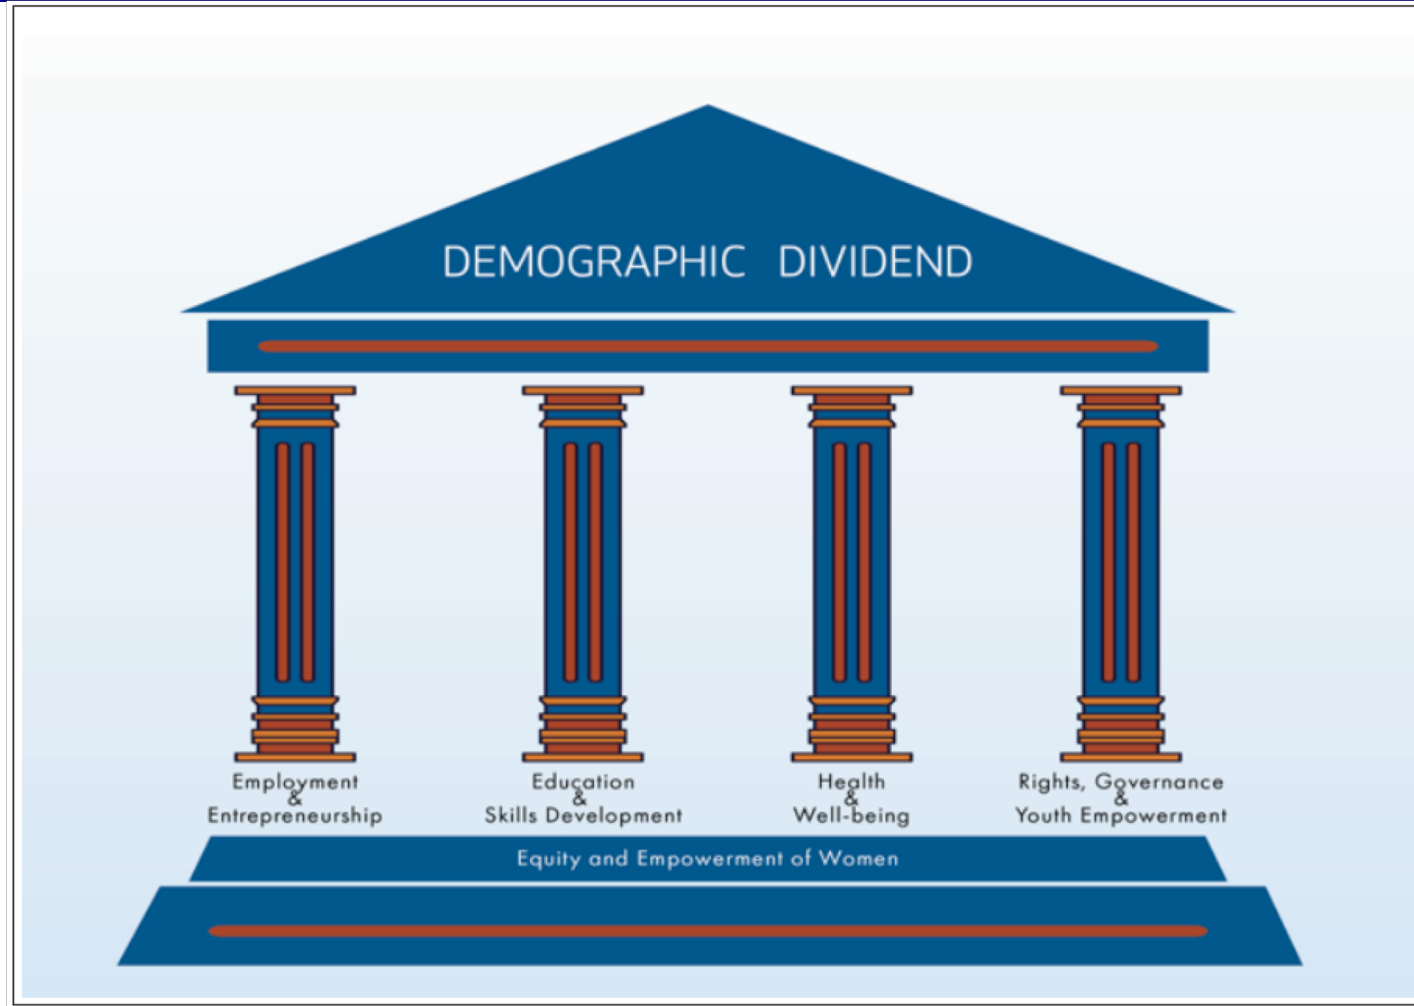

- **First DD** → The economic benefit that arises directly from the increase in the proportion of the working age population relative to dependent children as a result of fertility and mortality decline
- **Second DD** → Long-term economic benefits from increased investments in children; increased savings and investments by the working age population; and improved wellbeing and life expectancy (which enables people work longer) as the population becomes increasingly aged

# Population by broad age groups - 2015 vs 2050

# The African Union Demographic Dividend priority investment pillars

Source: AFIDEP 2017

# Are African countries ready to harness the demographic dividend?

# With right investments, EAC countries can harness massive DD – DemDiv Results

## Projected Per Capita GDP by Different DD Policy Scenarios (US\$)

Countries	Current PC GDP	Business as Usual (a)	Economic Emphasis (b)	Combined Scenario (c)	Potential DD Earned (c-b)
Kenya	907	896	6,693	11,288	4,595
Tanzania	967	2,063	7,779	11,657	3,878
Uganda	506	927	6,084	9,567	3,483
Rwanda	735	2,764	9,098	12,555	3,457

Study in four East African Community (EAC) countries -  
**Kenya, Uganda, Rwanda, Tanzania,**

Report and related briefing notes first launched in May,  
2018

# Total population in the EAC will more than double even with the projected fertility decline

Country	Scenario outputs	Baseline UN 2015	UN Medium Variant	Accelerated Model	UN Medium Variant	Accelerated Model
			2030	2030	2065	2065
Kenya	Population (Millions)	47	67	66	115	103
	TFR	4.1	3.3	3.2	2.3	2.0
Rwanda	Population (Millions)	12	16	16	25	25
	TFR	4.2	3.2	3.2	2.0	2.0
Tanzania	Population (Millions)	54	84	81	187	151
	TFR	5.2	4.3	4.0	3.0	2.5
Uganda	Population (Millions)	40	64	63	141	131
	TFR	5.9	4.6	4.5	2.8	2.8

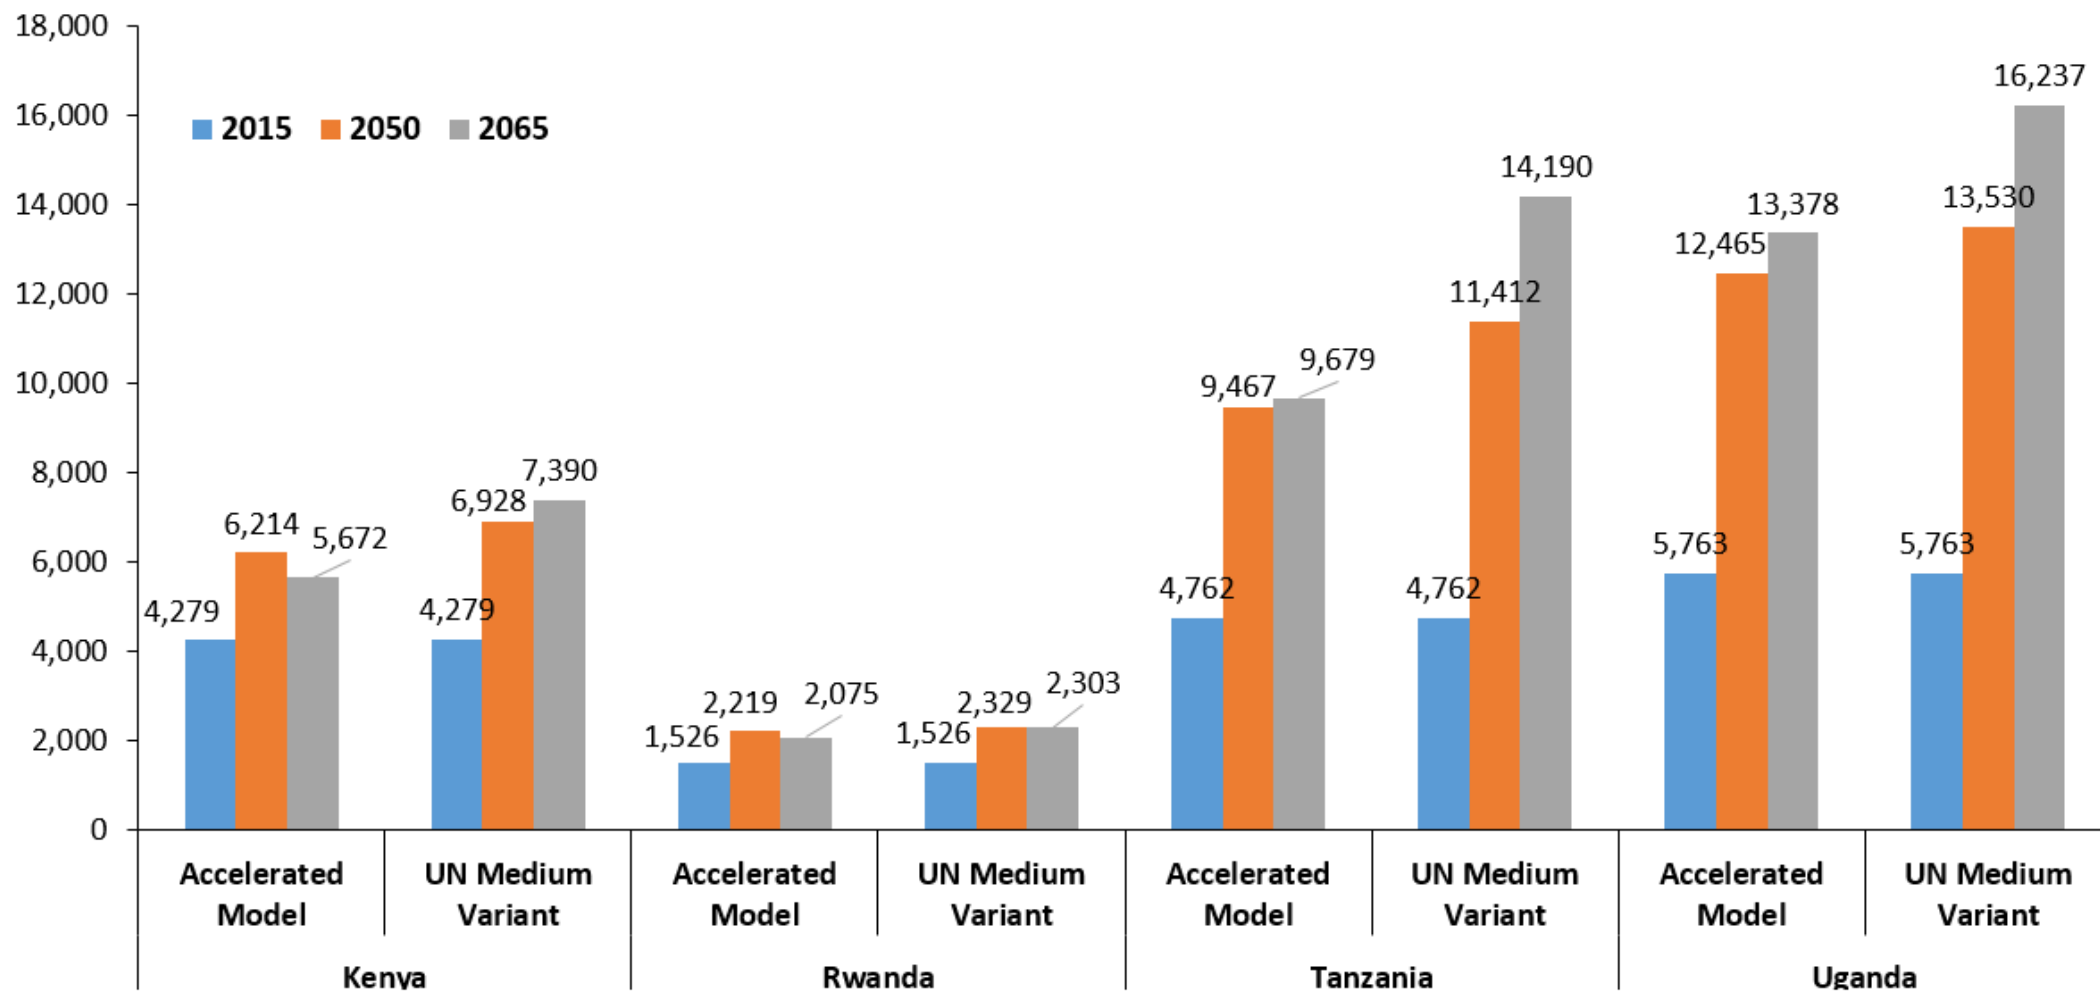

# Demand for modern contraceptives will increase 3-fold

Number of youth, 15-24 years ('000s) in need of modern contraception, UN Medium Variant Scenario (2015-2065)

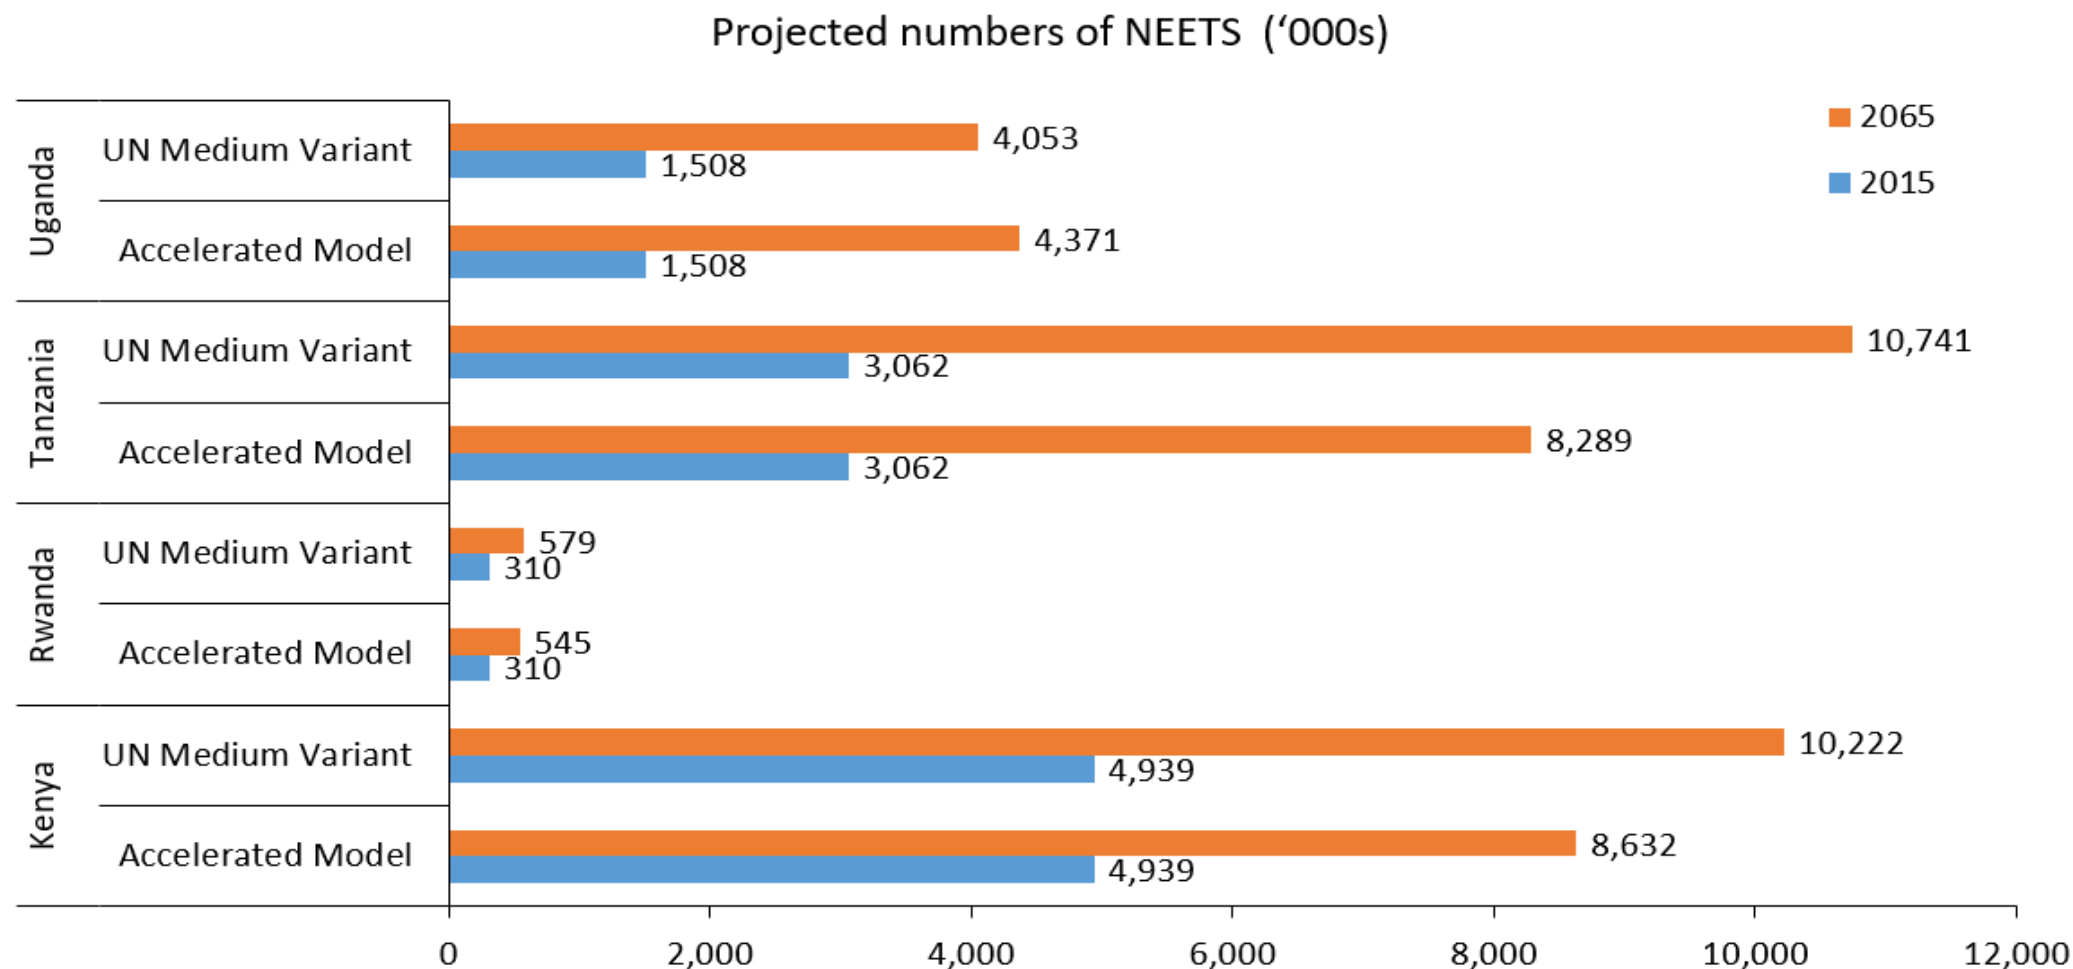

# The school-age population will increase significantly

*Estimated number ('000s) of secondary school places, 2015-2065*

# Number of youth who are Not in Education, Employment or Training (NEETs) will grow 3-fold under UN Medium Variant

# Highlights from the Botswana Demographic Dividend Study

# Aggregate Labour Income vs Consumption, Botswana 2010

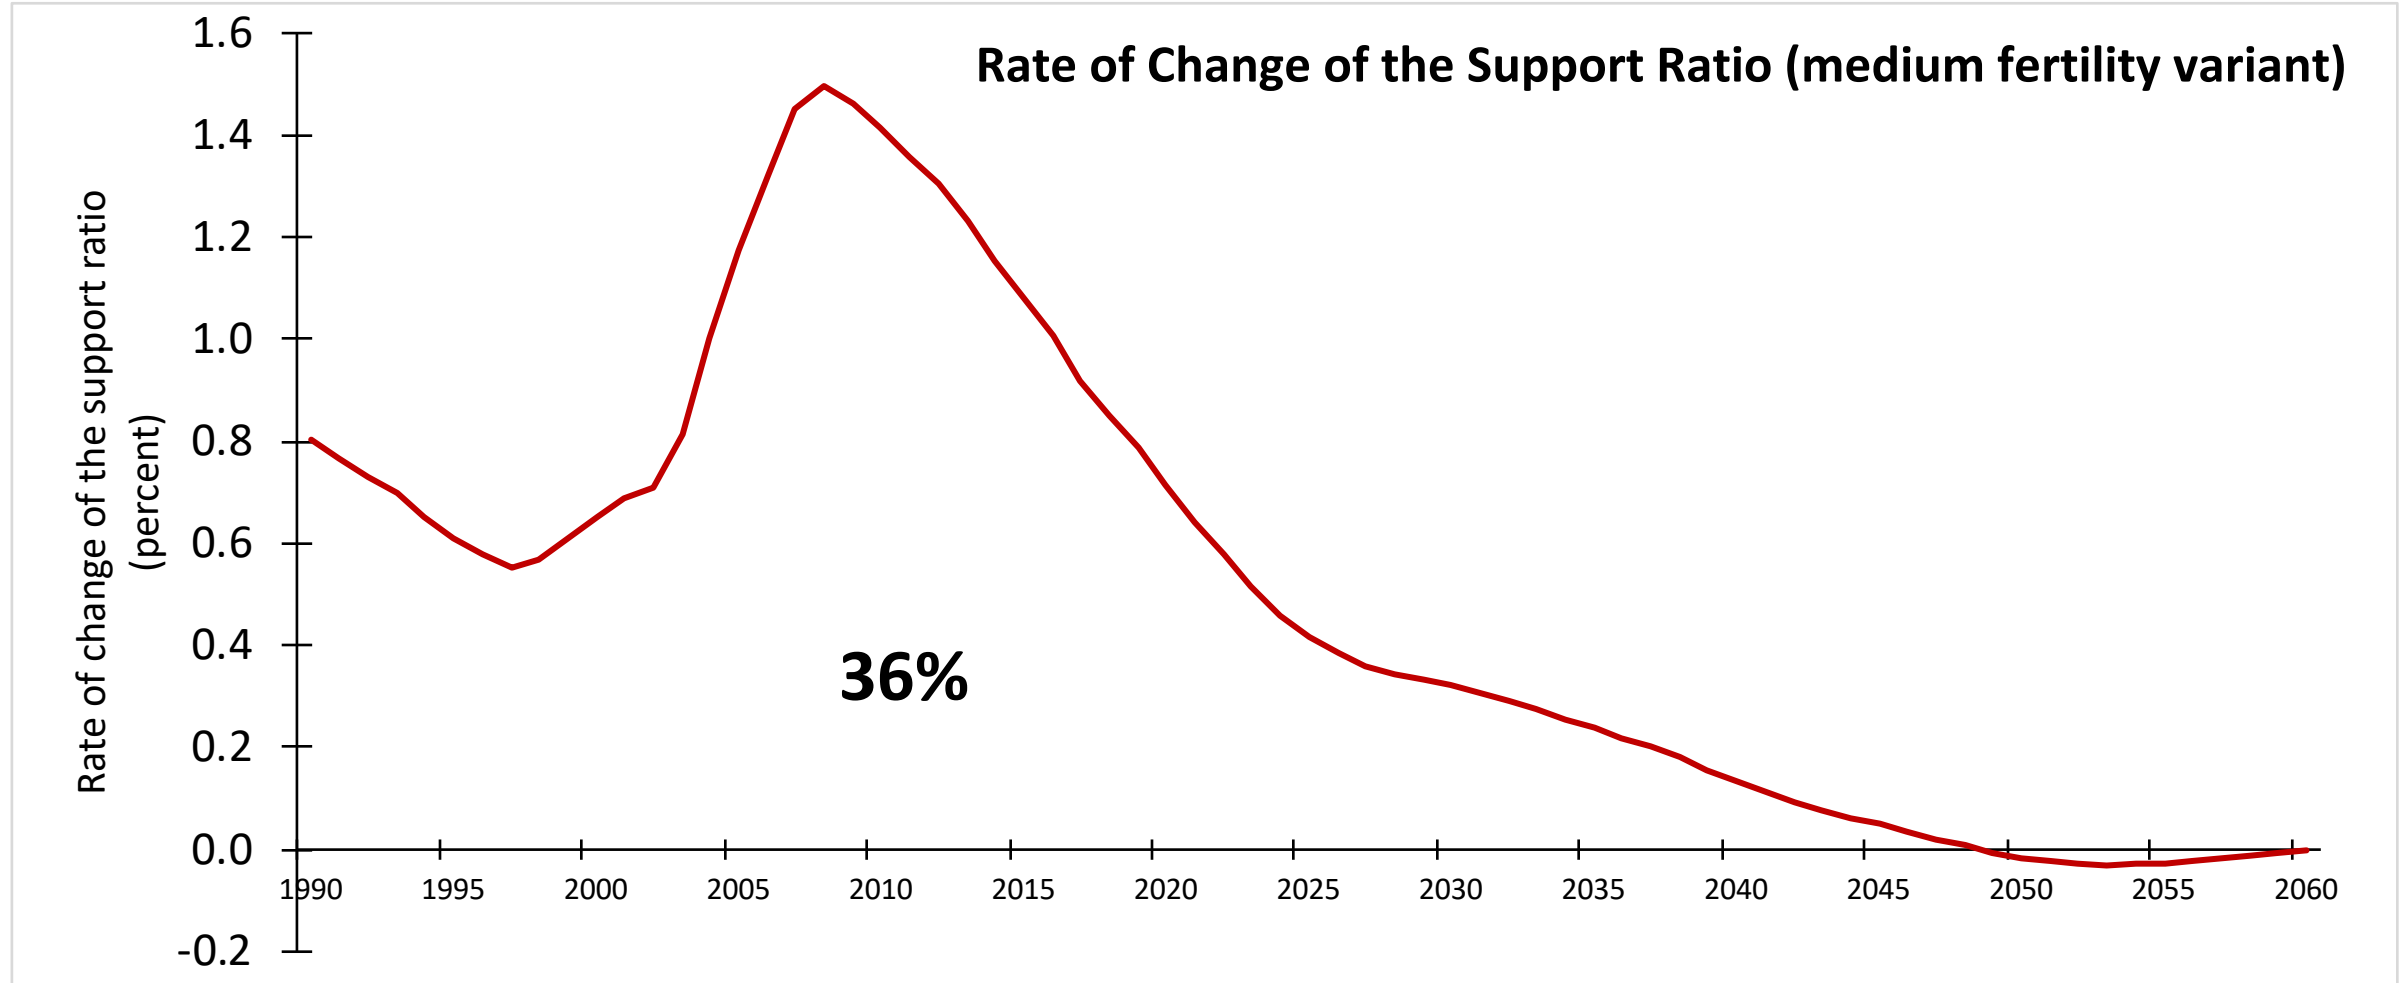

# Botswana's surplus is shorter and smaller ...

# The demographic dividend could boost living standards by 36% in Botswana

# Botswana has harnessed a significant DD – the window of opportunity to maximize it is short

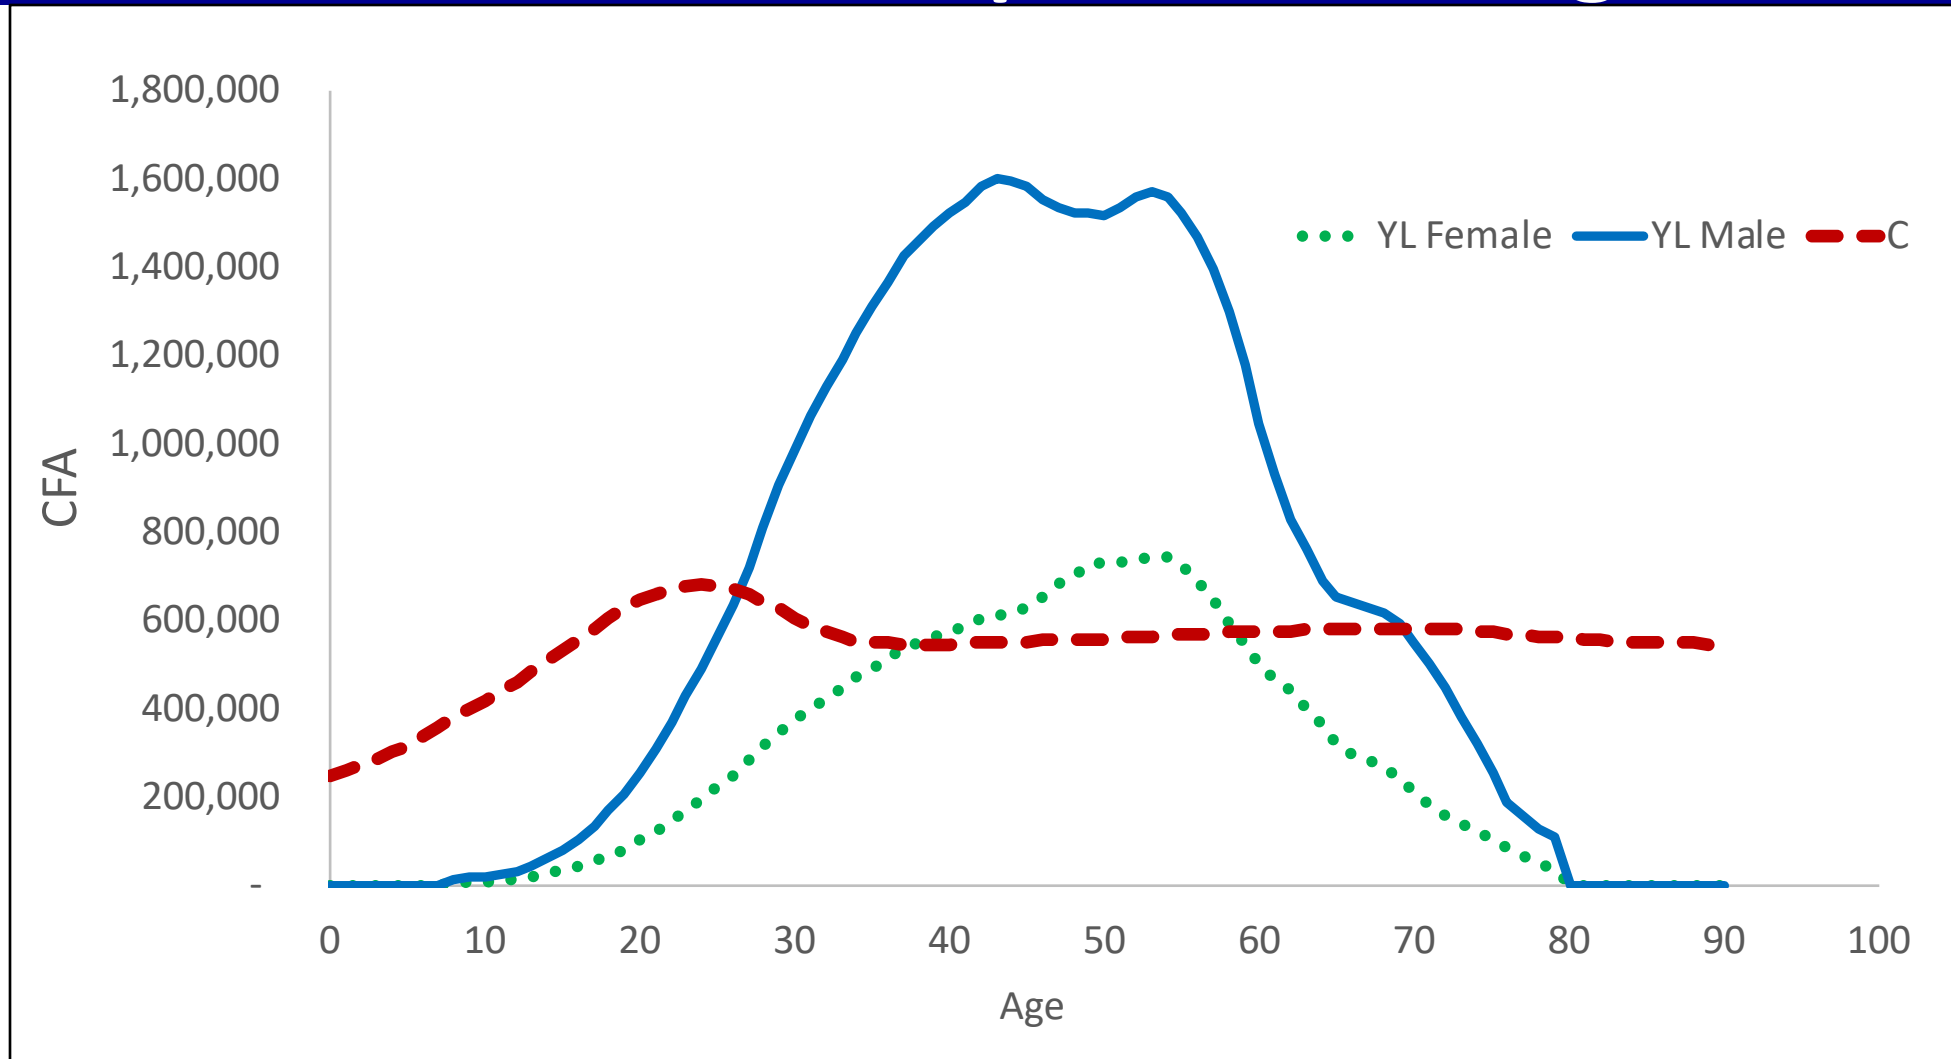

# How much would Botswana benefit from shifting the earning profile of its youth to the global average?

**Cumulative boost to living standards between 2015-2035 would be 21% with the shift versus 11.7% at status quo**

*We make research evidence matter in African-driven development*

# DD Milestones: Kenya, Malawi, Uganda & Zambia

Key Milestones	Kenya	Malawi	Uganda	Zambia
National DD Study	✓	✓	✓	✓
Strategy (Roadmap)	✓	x	✓	x
Planning (NDPs)	MTP	MGDSIII	NDPII	7NDP
Implementation				
Coordination mechanism	NCPD (MDP)	PDU (MFEPD)	NPA & NPC (MFPED)	SPD (MDP)
Structural changes				SAGs→CAGs
Budgeting process (Pilot)			ABB→OBB	ABB→OBB Citizens' Budget

# Factors that propelled success so far

- **Generating and packaging evidence (National DD Studies)**
  - Demonstrated demographic trajectory and potential dividend
  - Ignited DD discussion
  - Advocacy to secure political buy-in
- **Use of strategic champions to secure political buy-in**
  - Government ownership of the DD agenda
- **Strategic partnerships**
  - Government, development partners, private sector & CSOs

# Challenges to overcome

- I. In-depth policy prioritisation and performance analysis
- II. Systems thinking and integrated planning capacity
- III. Sustainable funding for demographic dividend interventions
- IV. Reinforce the role of the private sector and other stakeholders

# Thank you!
