PATIENT PATHWAY THROUGH TB CARE

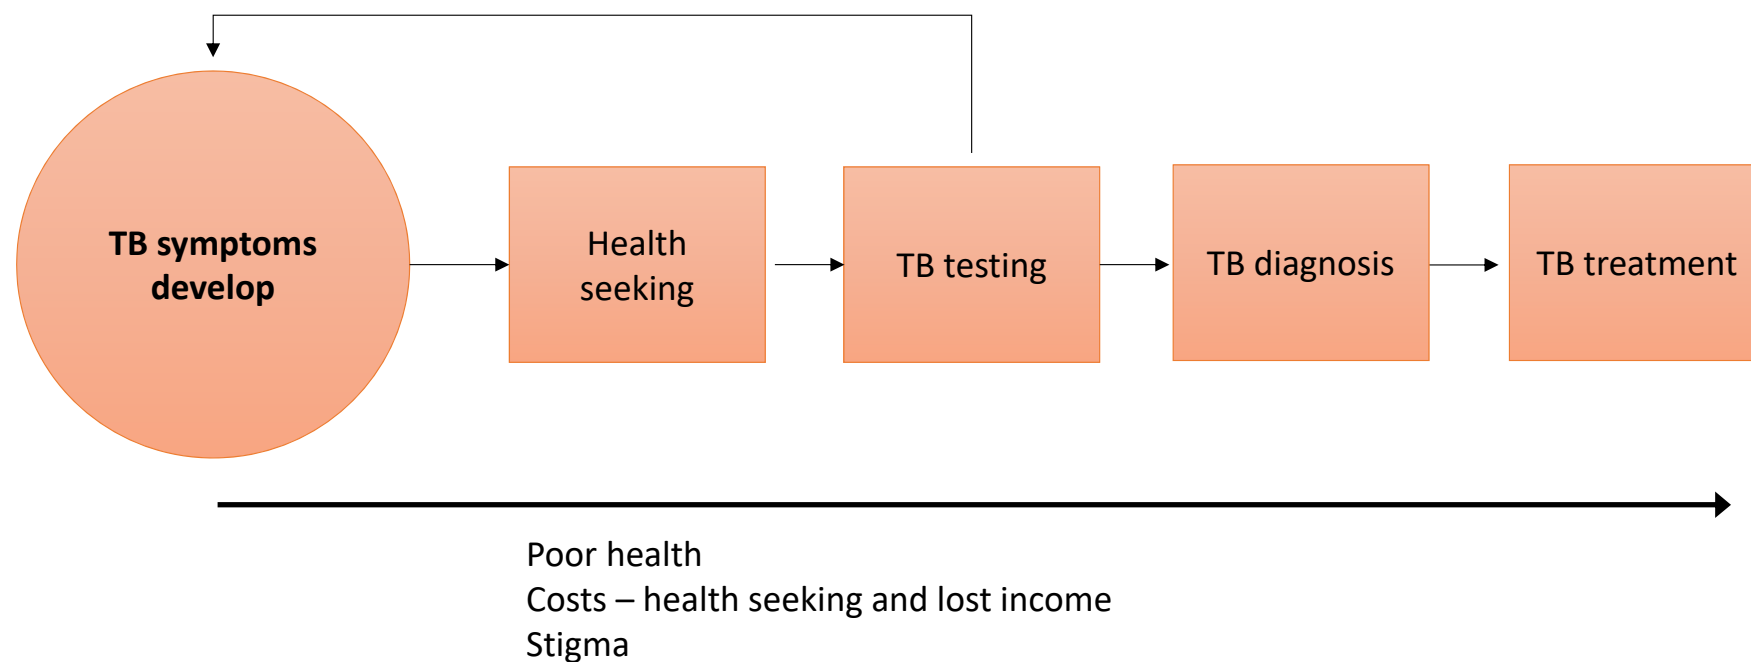

PATIENT PATHWAY THROUGH TB CARE

PATIENT PATHWAY THROUGH TB CARE

PRE-TREATMENT

PRE-TREATMENT

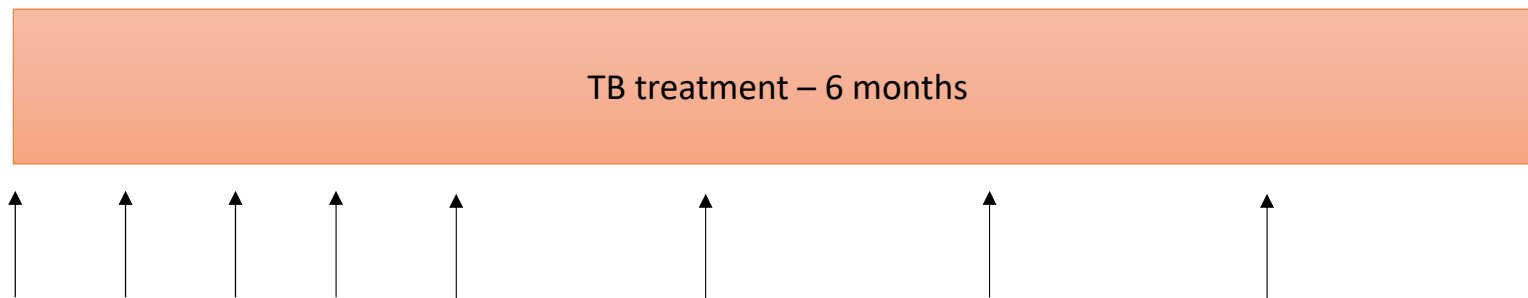

TB TREATMENT

I hope I will get
better

TB TREATMENT

- 2-4 weekly visits
- Daily medication
- Poor health – slow recovery
- Ongoing costs & stigma

TB TREATMENT

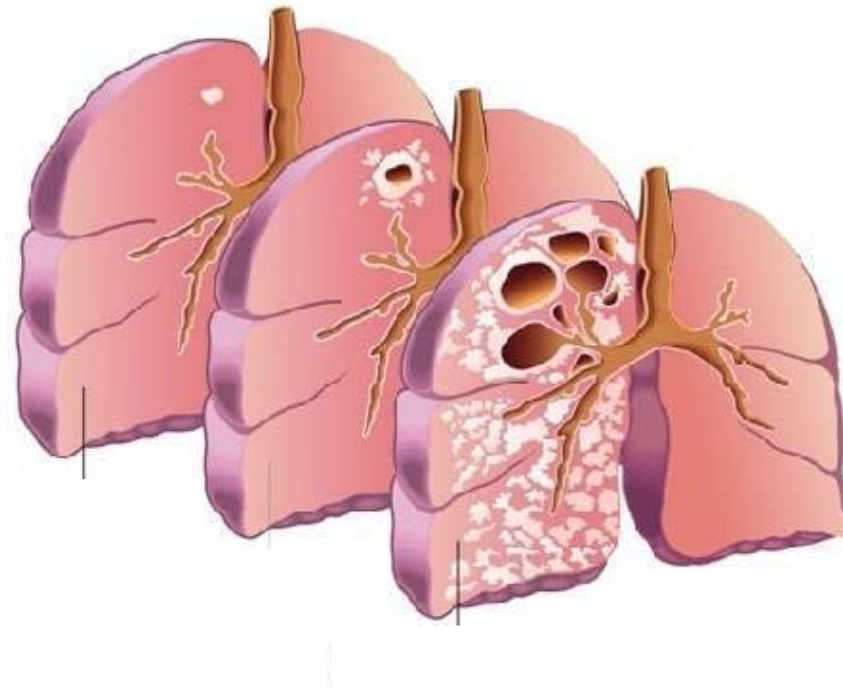

POST-TREATMENT

Why am I not
better?

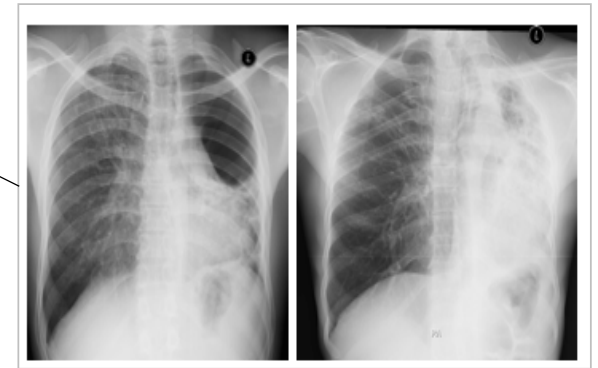

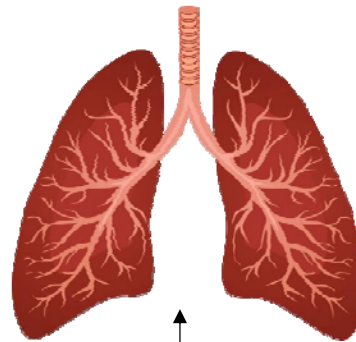

POST TB LUNG DISEASE (PTLD)

POST TB LUNG DISEASE (PTLD)

Bronchiectasis >35%

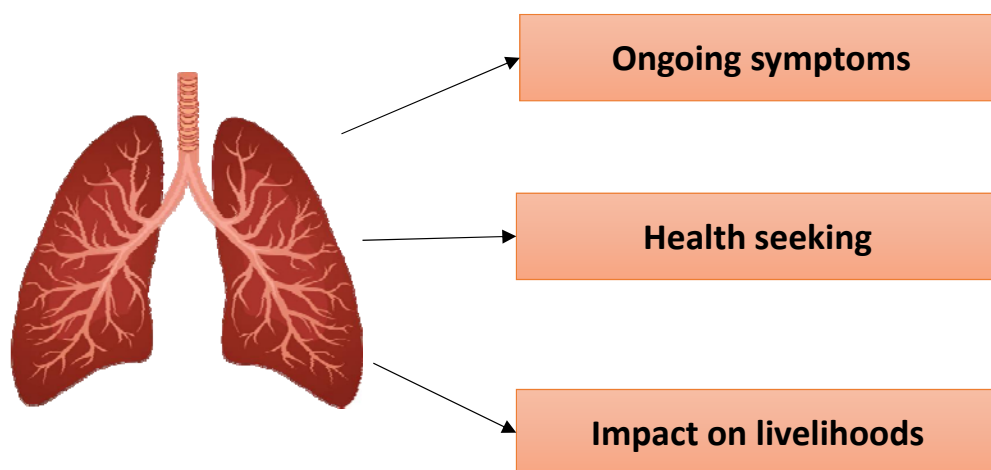

Destroyed lung ~10%

Airway obstruction ~15%

WHY IS THIS IMPORTANT?

Anxiety – what's wrong with me?

Stigma

Reduced quality of life

Limited activities

Patient costs

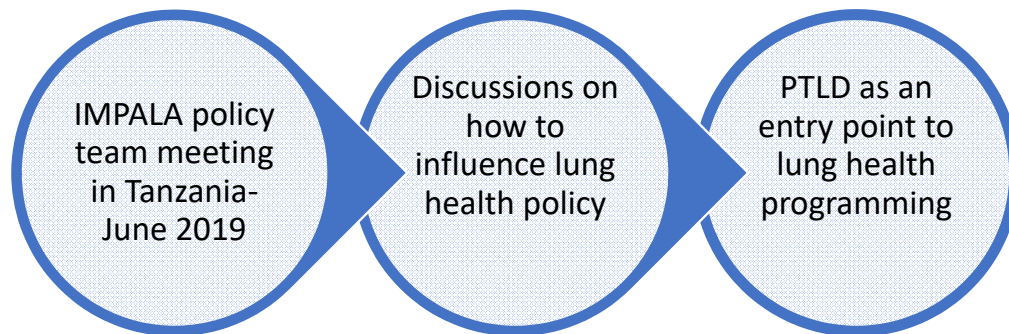

Health system costs

Anxiety

Stigma

- Functional limitation
- Time out for health seeking

THE IMPALA PTLD STORY

Window of opportunity

IMPALA team

- First in country meeting 20th September 2019
- During the meeting, feedback from the symposium shared
- Discussions on Post TB Lung Disease engagement for Kenya and Malawi held

Dr. Kibachio, Former head of head of Strategic National Health Programs

Dr. Onyango, Former head of NTP

PTLTD STAKEHOLDERS MEETING

Aim

- Raise awareness on Post TB Lung Disease
- Map a way forward on tackling post TB lung disease in Kenya
