TRILATERAL

# South-South and Trilateral Cooperation Structure in Brazil

- Role of the Brazilian Cooperation Agency – ABC;
- SSTC is a strong foreign policy component;
- Basis for South-South Trilateral Cooperation (SSTC);
- Reflection on 20 yrs of partnership (4/5 Dec) and new CPD 24/28.

# Main Results of SSTC – UNFPA and Brazil

## Production and Analysis of Population Data 2002 - 2012

- Demographic population censuses: georeferenced analyzes, data mgt, topographic maps, geographic operational bases, and new data collection technologies.
- Capacity development: Pop. dynamics, demographic research & public policies on social inequality, poverty, migration, RH and aging, use of new technologies.

**09 African and 13 LAC Countries Benefited**  
**05 National Demographic Censuses Supported**  
**200 Professionals Capacitated**

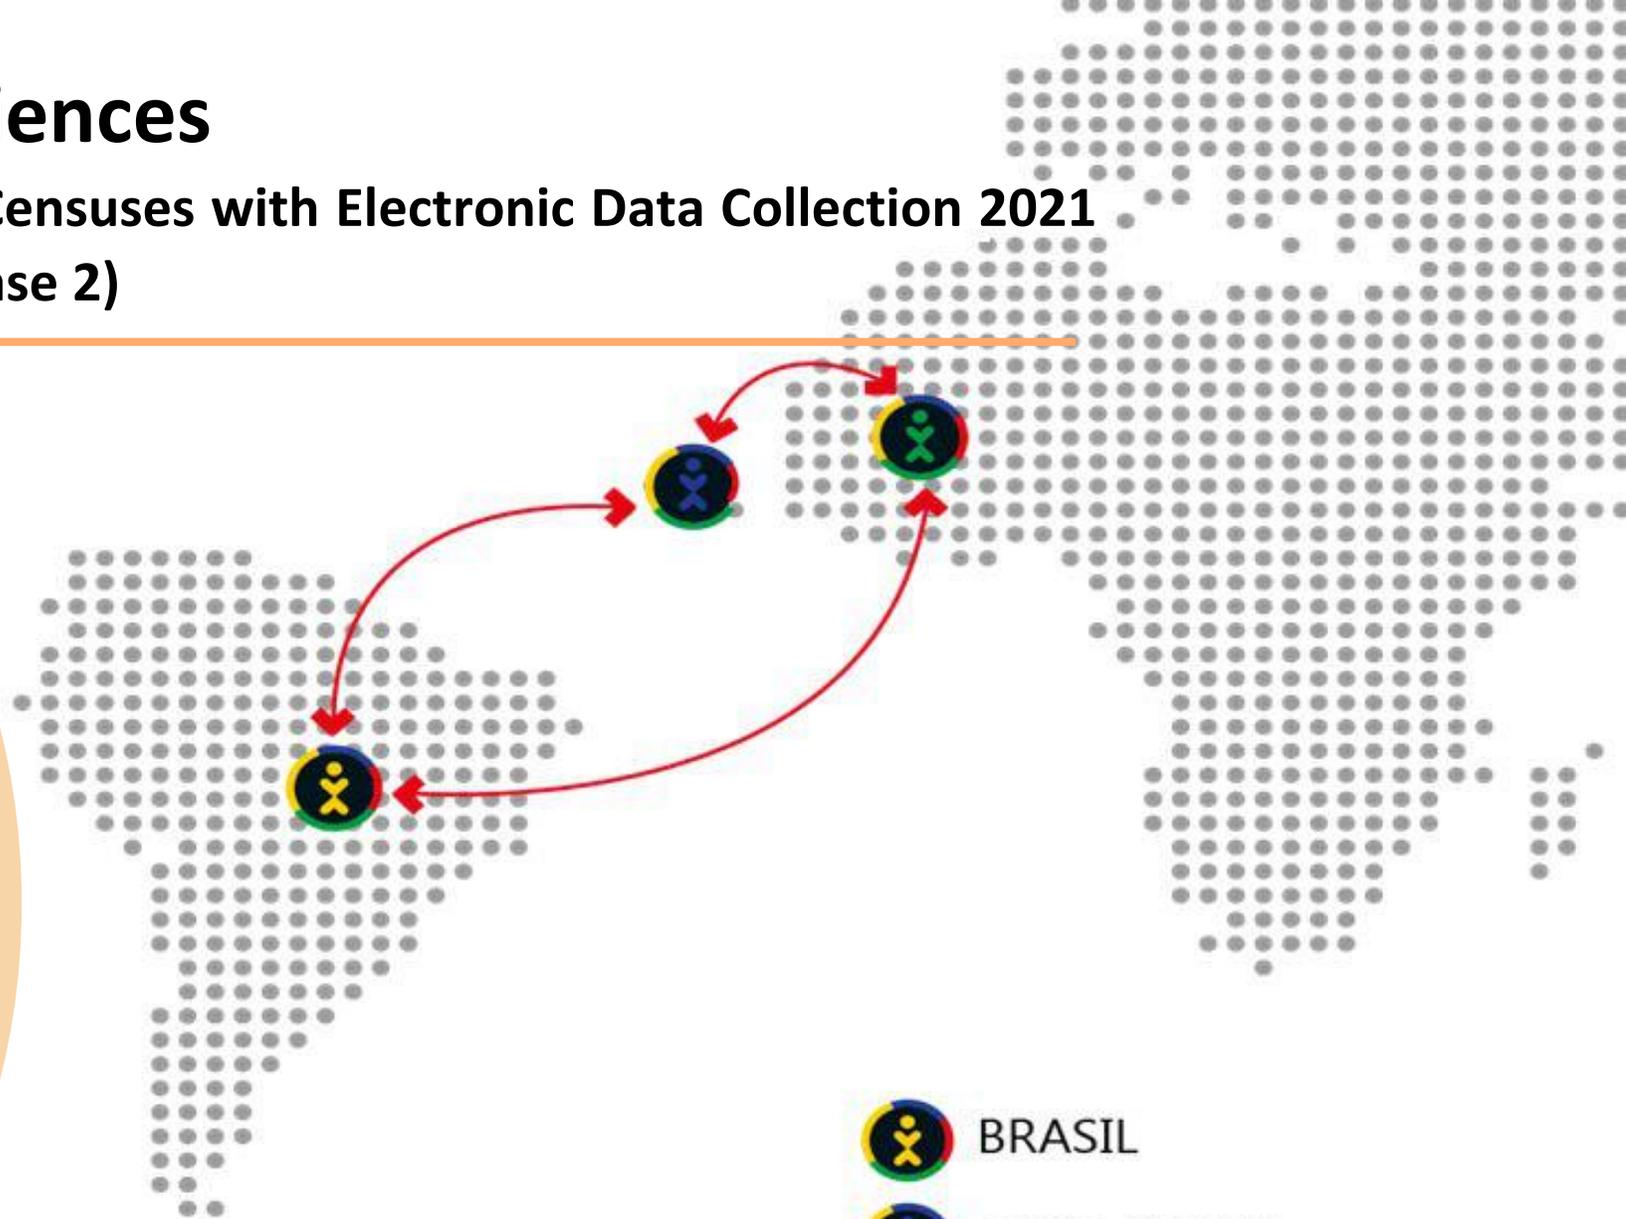

# Standout Experiences

Reference Centers for Censuses with Electronic Data Collection 2021  
(phase 1) and 2023 (phase 2)

Enabling statistics institutes in Cape Verde and Senegal to act as reference centers for censuses using electronic data collection

-  BRASIL
-  CABO VERDE
-  SENEGAL

# Standout Experiences

## Observa Censo - 2022

Exchange from 25 countries engaged;

18 international census observers had 1<sup>st</sup> contact with the census in Brazil.

# Standout Experiences

## Gender Based Violence - GBV

### Guinea Bissau – 2011

GBV response: Improve health care and life-saving of women and girls survivors of GBV.

### Haiti – 2012

Development of the National Plan to Combat Violence Perpetrated against Women and Children.

# Standout Experiences

## Maternal Mortality

### Angola – 2023: Maternal Death Surveillance Project

Maternal mortality reduction: focusing on maternal and child health & improving maternal death surveillance.

#### Expected Results

- Clinical management of obstetric risks;
- Monitoring and auditing of obstetric risks and deaths;
- Improved surveillance systems.

# SSTC Programme Brazil and UNFPA 2024 – 2028

## Expected Results

- Strengthen international cooperation and contribute to **reducing inequalities within and between countries;**
- Integration of evidence-based on population dynamics for **sustainable development, and the achievement of the 3 TRs;**
- Strengthening institutional capacities to share policies from a **perspective of horizontality, reciprocal learning;**
- Producing and **managing knowledge of good practices** in SSTC within the scope of the Brazil-UNFPA partnership program.

# SSTC Brazil and UNFPA 2024 – 2028

## Main Areas of Cooperation

Integrating **family planning** into SRH policies and programmes

Strengthening **primary and prenatal care health structures** and **emergency services** in obstetric and neonatal care

Strengthening networks for **protection, prevention and management of GBV**

Strengthening **data systems and evidence** to address Pop. changes and megatrends (including aging and climate change)
